

Atkinson & Kirby
Real Wood Flooring for Professionals

MAINTENANCE GUIDELINES Lacquered Floors

Vacuum and Damp Clean

Use a Vacuum cleaner on a daily basis. This will remove Dirt and Grit and save it from scratching the floor surface. For more thorough cleaning use a damp mop or cloth with a light spray of Atkinson & Kirby's Bona Cleaner. Remember, you must never use too much water on wooden floors. Standing water should be removed immediately.

Stains

As with all floor coverings stains should be removed whilst they are still wet. After removal of the stain, wipe the floor with a clean damp cloth.

Stain Removal Guide

Stain Type	Remove Using
Fruit, berries, fruit drinks, milk, cream, soft drinks, beer, wine, coffee, tea etc.	Synthetic cleaning products.
Chocolate, fat, oil, grease, shoe polish, shoe scuff marks, tar, asphalt.	White Spirit.
Ink (ballpoint, fountain pen), lipstick.	Methylated spirit.
Urine.	Synthetic cleaning products.
Blood.	Cold Water.

The above is for general guidance only. If in doubt, check on a small area first.

Repairs

Small nicks and scratches can be touched up using our colour-matched fillers. For slightly larger areas a small amount of our Touch-Up sealer can be mixed with the filler. In the case of larger areas of damage the floor can be sanded and resealed. Only a suitable expert should carry out this type of work.

Re-Sealing and Rejuvenating

After a period of time you may find that in some areas (entranceways, high traffic areas etc.) the floor starts to look dull. In the first instance use Atkinson & Kirby's Bona Refresher. For best results this should be used with our Refresher Applicator.

With correct maintenance your Hardwood Floor will give many years of use, adding a warmth and beauty. Supplies of Bona maintenance products are available from your local supplier.
